

## BRAECREST BREEDING SERVICES 2022

**Breeding with fresh chilled semen, per cycle: \$500 +HST**

- ▶ Includes all ultrasounds
- ▶ Includes artificial insemination
- ▶ Includes pregnancy check ultrasound at 14/15 days post breeding

**Possible extra costs related to breeding:**

- ▶ Uterine Culture (on farm) **\$50**
- ▶ Oxytocin Post Ovulation **\$10 per treatment (average 2-4)**
- ▶ Deslorelin for Ovulation **\$60**
- ▶ Estrumate to bring them into Oestrus **\$25**
- ▶ Courier Services for Airport Pick-Up or Local Semen Pick-up **\$50/hour**
- ▶ Mare Care Boarding **\$30/day**
- ▶ Mare Care Boarding with Foal At Side **\$45.00/day**

Our mare care boarding services include stabling, free choice hay, grain as required (or owners can provide if they don't want to use Brooks feeds), daily turnout, and grooming.

Owners are welcome to take their mares home after breeding/ovulation and bring them back for their 15-day pregnancy check ultrasound. We do not provide any mobile ultrasound services.

**All prices are subject to HST.**

We work closely with the vets at Georgian Bay Equine and Ferguson Equine Veterinary Services. Any unusual findings on ultrasound that need to be discussed, cultures sent to the lab, or caslicks procedures will be organized through one of these veterinary clinics. Clients will be required to pay for those services directly with the associated clinic. Any veterinary work required will be discussed with the owners before booking any procedure.
